

Microsoft 365 Copilot Reference Guide

Comprehensive Notes on Work Account Integration & Ecosystem Workflows

1. Copilot Access Labels

Microsoft utilizes specific tiers to designate Copilot access levels associated with work accounts:

Your Label	General Meaning
Copilot Chat (Basic)	Web-based Copilot Chat access only; excludes full embedded app experiences in Word, Excel, and PowerPoint.
M365 Copilot (Basic)	Standard Copilot capabilities enabled inside supported Microsoft 365 applications.
M365 Copilot (Premium)	Advanced add-on tier with full priority processing and complete enterprise capabilities.

Note: Exact feature availability depends heavily on your organization's tenant configuration and active licensing rules.

2. Word Copilot Integration

Open a blank Word document to leverage AI-powered document creation and editing assistance:

Create a professional two-page project proposal for a Microsoft 365 implementation. Include objectives, scope, timeline, risks and next steps.

Key Editing Capabilities

- Transform text:** Rewrite, summarize, shorten, expand, or adjust tone.
- Refine content:** Enhance professional vocabulary or instantly generate structural outlines.

If missing, check licensing, Office build/version, update channel, and privacy settings.

3. Excel Copilot Workflows

Analyze tabular data instantly by opening a workbook and activating Copilot:

Month	Sales	Expenses	Profit
January	10,000	6,000	4,000
February	12,000	7,000	5,000
March	15,000	8,000	7,000

Analyze this data and identify the main trends. / Create a chart showing sales and profit by month.

4. PowerPoint Presentation Setup

Generate structured slide decks automatically from natural language instructions:

Create a 10-slide presentation about Microsoft 365 Copilot for a business audience. Include Word, Excel, PowerPoint, Outlook and Teams.

- **Core Actions:** Add or summarize slides, rewrite text, build speaker notes, and restructure layouts.
- **Agents:** Utilize Word, Excel, and PowerPoint Agents to draft deliverables autonomously.

5. Outlook & Teams Collaboration

Outlook Email & Calendar

- **Summarize threads:** Extract action items instantly.
- **Drafting:** Compose professional responses on command.
- **Prep:** Coordinate meeting contexts and schedules.

Microsoft Teams Meetings

- **Live Catch-up:** Ask "What decisions were made?" or "Who is responsible for action items?"
- **Unanswered Questions:** Track pending meeting queries efficiently.

6. Connecting the M365 Ecosystem

The Power of Context: With proper licensing, Copilot synthesizes organizational data across Outlook, Teams, OneDrive/SharePoint, Word, Excel, and PowerPoint while rigidly respecting existing security permissions.

Summarize everything I have access to about the ABC project and identify outstanding tasks.

7. Central Copilot App & Web Portal

Access centralized experiences via the web app (copilot.cloud.microsoft):

- Features include Chat, Library, Agents, Search, and Cowork mode.
- Provides direct single-click gateways into Outlook, Word, Excel, PowerPoint, and Teams.
